

## Middle School Students Succeed at First Virtual Science Fair

Clinton middle school students, undeterred by COVID, participated for the first time in a virtual science fair advised by middle school science teacher Mrs. Boucher. Students ranging from sixth to eighth grade were required to conduct an experiment in the comfort of their own homes, and later present their findings via video. Hamilton College students serving as judges were able to view student videos prior to the event to facilitate engagement during the student presentation. Top finishers will go on to participate in the Regional Virtual Science Fair at Utica College in March.

Congratulations to the following student participants:

**Eighth grade contestants include:** Elizabeth Bashant, Eli Davis, Sophia Dunikova, Gideon Dreier, Gabriella Gemelli, Gretchen Grimm, Clara Kelly and Maren Wohnsen.

**Seventh grade constant,** Charlotte Gale.

**Sixth grade contestants include:** Gabriella Bastian, Adrianna Benn, Sam Bono III, Mackenzie Covell, Jude Leising, Devyn Roy, Emily Roy, Clara Shaw, Sabrina Vogel and Noah Whipple.
